ORLANDO, FL	No	Yes	No	No	Yes	Yes	NONE	Some Zika risk

PPD Testing 8-10 weeks after return for Tuberculosis only needed if working In hospital, prison, or shelter

The above vaccines are what the CDC and MMA Health Services supports for these regions.

Other appropriate vaccines have already been done as part of your MMA attendance
(Hep B, Tetanus, Polio and other childhood vaccines.)

Please note these recommendations may change year to year based on outbreaks and resistance patterns.

Medical questions may be directed to Health Services.

Health Services does run an annual vaccination clinic for commercial shippers and International/Remote experiences. Support can also be found from travel clinics or potentially your own physician.
